# Emergency Medical Technician

## Basic

The EMT-Basic (Life 129) class is offered fall, winter, and spring quarter and adheres to the NHTSA/DOT guidelines. Upon successful completion, the student is able to sit for both the Washington State EMT-B and the National Registry EMT-B exams. This class is designed to prepare students to enter into the Pre-Hospital care field by participating in classroom lectures, performing skills in lab settings, and continuing the learning process in a 10 hour emergency room clinical. If the student is not sponsored by the time of the Washington State EMT-B exam they will have one calendar year to get sponsorship for their state certification. Students must be 18 years old and have a High School Diploma or GED. Perspective students need to have a current CPR card; either AHA healthcare provider or ARC professional rescuer. The student does not need to be sponsored to be registered for this class.

## Paramedic

The EMT-Paramedic program offers a Certificate and an A.A.S. degree. The Certificate program encompasses four quarters and is designed to prepare students to enter into the Pre-Hospital field by participating in classroom lecture, performing skills in lab settings, and continuing the learning process in clinical settings where they are supervised by well qualified professionals in the specific area. Finally, students enter into an intense and comprehensive Field Internship to prepare them for success in the Pre-Hospital field. Those students interested in achieving the A.A.S. degree must complete 20 credits from a list of required Liberal Arts courses **and 7** credits of department approved electives in addition to the one-year certificate program. Perspective students need to have a current EMT-Basic certification for a minimum of one (1) year. In addition to the above requirements perspective students must complete Anatomy 108 and Physiology 109 for the certificate program and students striving for the A.A.S. degree must complete Anatomy and Physiology 242 and 243 (recommended for all students) prior to entrance in the fall quarter. Students may enter the Paramedic program only in the fall quarter; the required Liberal Arts courses for the A.A.S. degree may be taken either before or after the certificate program completion.
